Email us today for more information about the programmes and how to apply! greeneeconomicseducation@yahoo.co.uk

Visit us at: www.greeneeconomics.org.uk

These challenging programmes provide you with the analytical, written, presentation and publishing skills and experience to lead others towards your vision of a socially and environmentally more survivable and just, positive and exciting future- giving you the tools and know how to lead the power structures, policy making, institutions, and taking part as you learn in the way the world really works.

We make a charge for some of our programmes. Please ask for details.

We run a formal set of Programmes with individual pathways for students. Some students follow a work experience pathway, some students follow our Charitable Trust Pathway, some students follow an academic pathway working on our academic publications and journal and some students follow a publishing pathway. As its our 10th Anniversary in 2015 we are particularly keen to hear from prospective students who can help us organise events to celebrate and also academic and other conferences or fund raising activities.

We especially want students who want to change the world, change economics or improve biodiversity or halt the tide of climate change. All our students worry about poverty and also how economics doesnt really work today. If you are a change maker or see yourself at the forefront of innovation, or if you like writing or speaking or attending or running conferences, love nature or wildlife – have an international perspective, and are inclusive and caring then this may well be the study programme for you.

Please email today for more details.

All participants on this programme will have enriching experiences and deepen their knowledge :

- Green Economics Conference: attending and presenting a paper at our conferences held most often at Oxford University, with an attendance certificate);
- Writing and Editing Academic Papers for our Oxford University Conferences. (Students get their name on the publication as a citation for this).
- Students compile and edit our members international networking magazine *The Green Economist*.
- Policy Briefings, and Reports.
- Financial advise to governments and departments around the world when the Institute is providing this we involve our students.
- Writing and Editing Books and Book Chapters. Most of our students recently have produced at least one book of their own ideas and collated those of other people. Our recent students' books include *The Greening of Italy*,

The Greening of India, Rebalancing the Global Economy, Greening the Global Economy, The Green Transport Revolution, Fairtrade in Europe, The Greening of Latin America, The Mediterranean Economy: Crisis and Recovery and many more !

- Research and economics analysis of the economy
- Writing, editing and reviewing for Academic journal: *The International Journal of Green Economics*
- Arranging Events especially our various Conferences,
- Organising campaigns
- Running and participating in Field Trips,
- Running Training courses and speaking at events in a variety of settings.
- Working on exhibition stalls with our teams
- Helping us with our technology and innovation

We pride ourselves on the success of our inclusion practice. We are especially welcoming for people with all kinds of special needs and challenges including health, physical, mobility and personality. We also offer access, diversity and outstanding opportunities for minorities and people with non standard backgrounds. We are proud of our record for creating true opportunities for social mobility.
